**FAIR VALUE DISCLOSURE OF FINANCIAL INSTRUMENTS**

All financial assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, as described below:

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: Other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly

Level 3: Techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data

There are no material changes in the fair value of financial assets categorised under Level 3 compared to the values reported as at 31<sup>st</sup> December 2024. The Bank has not changed the valuation models and assumptions used to measure the fair values of Level 3 financial instruments during the period ended 31<sup>st</sup> December 2025.

**Note\***

The following describes the methodologies and assumptions used to determine the fair values for those financial instruments which are not already recorded at fair value in the Financial Statements:

For financial assets and financial liabilities that have a short term maturity (less than a year), it is assumed that the carrying amounts approximate to their fair value. This assumption is applied to savings deposits without a specific maturity. Loans and advances to customers with a variable rate also considered to be carried at fair value.

The fair value of fixed rate financial assets and liabilities carried at amortised cost are estimated by comparing market interest rates when they were first recognised with current market rates for similar financial instruments. The estimated fair value of fixed interest bearing deposits is based on discounted cash flows using prevailing interest rates of the Bank.
